SYSTEMS

ARE YOU PROTECTED?

SECURITY SPECIALISTS YOU CAN TRUST

[www.veritech-systems.com](http://www.veritech-systems.com)

Are your expensive  
and sensitive assets  
adequately protected?

How can you stay secure?

Ensuring that 24/7 protection is in place can prove costly and not all security solutions provide adequate cover.

At Veritech we understand how important it is to keep your property, possessions and sensitive material secure, and all within a workable budget.

We work with our clients to provide bespoke security solutions ideally suited to individual requirements.

# How can we help you?

Veritech have an unblemished reputation for working with local businesses, households and community projects, delivering reliable security solutions.

Currently in operation at multiple sites across Southern England, we pride ourselves on providing exactly what our clients need and expect.

Individual security packages include:

- Security Guards
- Concierge Security
- CCTV and Perimeter Beams
- Mobile Patrols
- Access Control
- Key-Holding Service
- Fire Detection Systems
- Satellite Communications
- Licensed Dog Handlers

We cater for:

- Commercial Premises
- Domestic Properties
- Vacant Properties
- Maritime Electronic Security
- Construction Sites and Retail Parks

You'll benefit from:

- Crime Prevention
- Peace of mind
- Protected 24/7

# Who are Veritech?

Veritech Systems have many years of extensive knowledge and expertise in the security industry. Through the provision of unrivalled quality commercial security services to businesses operating in the public and private sectors, Veritech's unparalleled philosophy has allowed us to build a solid foundation, with dependable staff and equally loyal client base.

Veritech Systems recognise the importance of our security team in providing a customer service that goes above and beyond clients' expectations. Veritech believe that the key to providing a first-class service lies with investing in the workforce and equipment, which is why Veritech have made significant contributions towards recruitment, training, health & safety and development in terms of our Managers, Supervisors and Front Line Security Officers. By making a continuous effort towards the personal and professional development of the Veritech Security Team, we have achieved a greater level of staff motivation and customer satisfaction.

Veritech ultimately provide peace of mind, enabling our clients to focus on achieving their business objectives, rather than dealing with the worries and concerns associated with the security of their employees and premises.

# Our services

Through our comprehensive health & safety site surveys we will establish an individual security package tailored specifically to your requirements.

## Security operatives

Our security guards are hand-picked generally from ex-military and ex-police backgrounds. They're then highly vetted, trained and monitored before being employed by Veritech.

## Concierge security duties

Veritech offer concierge security duties unique to your front-of-house needs. From hotels to student accommodation, we want to ensure that you get the most out of the service you're paying for. We understand that we are representing not only our company but your establishment, too, which is why we combine our guarding capabilities with a supreme level of customer service.

## Surveillance

Combinations of CCTV and perimeter beam detection technology can be set up to maintain 24/7 security. At Veritech, we keep a close eye on the latest technological developments, allowing us to offer you the most effective and efficient security monitoring systems. We have our own in-house 24/7 control centre and engineers team.

## Mobile patrols

Regular checks are carried out by Veritech patrol units to provide additional peace of mind that sites are secure.

## Access control

Controlling the access points to a site or property can impact overall perimeter security. With our bespoke biometric turnstiles, your property's security is maximised. Veritech also install and maintain RFID (Radio-Frequency Identification) entry systems and ANPR (Automatic Number Plate Recognition) cameras and barriers.

## Key-holding service

We can hold the keys, codes or access instructions on your behalf and provide structured access to your property or site. Acting as first point of call for alarm activations, negating the need for client's own staff being responsible, especially in the early hours.

## Fire detection

We can supply a range of wireless temporary fire-detection and alarm systems for construction sites. We work closely with construction companies' fire-risk assessors to supply systems which meet the individual requirements of each site.

## Satellite communication

Where broadband internet is not available, using proven satellite technology, Veritech delivers fast Internet access straight to location. We use a small lightweight satellite dish providing up to 20 Mbps download and 6 Mbps upload speeds to provide CCTV monitoring to our 24/7 control centre, or to provide fast reliable Internet services to staff on site.

# Where we operate

We can maintain security for corporate, commercial, construction and residential premises on both land and sea.

## Commercial premises

Veritech is one of the UK's most trusted providers of security services. We offer a comprehensive range of services from commercial security to public sector safeguarding. Whatever your needs, our staff are here to provide a safe and secure environment to help your business thrive, regardless of size or location.

## Residential properties

Providing both permanent and temporary security solutions for residential properties gives you a guaranteed quick response to a security alert whether you are in the property or away.

## Vacant properties

Vacant properties can often attract unwanted visitors. Veritech secures all access points with steel metal sheeting and further provides internal PIR (Passive Infrared) systems.

## Maritime electronic security

Both commercial and private marine security can be established, protecting boats when in a berth and moored at sea with state-of-the-art, specialist surveillance anti-corrosive equipment.

# Security Operatives

Maintain a regular presence to make sure no one's watching

At Veritech Systems we provide man guarding and dog handlers for sites and premises nationwide.

## What's included?

- Hourly manned patrols
- Perimeter security inspections
- Veritech management will meet with the client to undertake a pre-security survey and health & safety site survey
- Discussion on out-of-hours emergency procedures
- Security officer welfare audits
- Site log books
- Daily occurrence logs
- Guard patrol system
- 24-hour control centre and duty managers

## How can manned guarding increase your level of security?

If a person is watching with a close eye, they may begin to track the vacant hours of the property or site and learn the different faces of the business. However, with a security presence, the site or property has a permanent attendance during the usual vacant hours. Each guard patrol will be scheduled during random hours, therefore the perpetrator cannot note the exact vacant times of the property.

# Corporate and Concierge

*"It takes just a few moments for visitors to form an impression about your company, and if the person who greets them is welcoming, highly trained, impeccably polished and efficient then the impression will be a memorable one."*

Veritech services a range of clients from major corporations to prestigious mixed-use developments such as student accommodation blocks, and blue chip companies.

Our concierge/front of house staff are specifically recruited and selected on their potential for providing great customer service and then trained to provide excellent customer liaison and security functions. All operatives are fully trained fire wardens and hold First Aid certificates. All operatives wear a **Body Camera** and carry a **Thermal Imaging Device**, to assist with intruder and fire detection.

## Our Corporate/Concierge security staff deliver a service which focuses upon:

- Reception Meet and Greet • Meeting Room Management • Corporate Help Desk • Post
- Internal and External Building Patrols • CCTV and Remote Surveillance • Access Control
- First Aid • Fire Marshall Duties • Evacuation Procedures • Disability Awareness • Health & Safety Procedures

# Quality Management System

Unlike any other security providers, Veritech are genuinely fully compliant 24/7; clients can request full access for auditing at a moment's notice.

Introducing "MAC" - The ultimate, fully automated, contractor compliance management tool! MAC is a breakthrough in evidencing Compliance and Action Planning in a simple to use yet hugely powerful online system, providing peace of mind for contractors and their customers.

## Contract Compliance – Raising Industry Standards

It enables our customers to monitor our compliance and to be assured that the necessary standards are being met and practices being followed in all areas including:

- Health & Safety
- Environmental
- Policies, Procedures and other key documentation
- Training
- Audits
- Accreditations and Certification

## QuiqCare Compliance Platform

MAC sits on the proven QuiqCare platform used extensively in other sectors including NHS, Health & Social Care and Education. The platform provides security and resilience to ensure core information is always available, and high-quality support services mean there is help on hand when you need it.

# CCTV

The security system that catches everything

**Purchase or hire our CCTV systems from as little as £69 per week!**

Veritech offers a reliable CCTV security system for your site or premises. Our cost-effective visual and recorded media systems provide crucial assistance for the management of security.

How can a CCTV security system benefit your business or home?

- Surveillance of perimeter security (internal and external systems)
- 24-hour visuals on site and recorded media
- Protection for staff and customers
- Theft prevention
- Live alert of a crime taking place
- Assistance for court proceedings and claims
- Supports health & safety initiatives
- Respond to incidents 24/7

# Access control

The leading workforce management system for construction sites

**Right person. Right skills. Right place.**

Veritech combine a worker identification check, inductions and training system with fingerprint biometric turnstile access and egress control to manage construction site personnel and security.

We provide you with hardware and software to ensure your workers are the right person, with the right skills, and they are in the right place.

# Fire detection systems

What are the benefits of a wireless fire alarm system?

The principal benefit of using a wireless fire alarm system compared to a wired version is that it is very easy to install and reposition the call points as building work progresses. That makes placing the fire alarm call points, active heat detectors and smoke detectors a much more efficient process. In a nutshell, there are not trailing wires, which require specialist trades such as electricians, and could cause a trip or other safety hazard, such as cutting or drilling them.

**Choosing a system**

One of the main requirements when choosing a fire alarm system for a construction site is to ensure that it is EN 54 compliant. Of course, there are other factors to consider as well when looking for an effective way of protecting personnel and assets from fire.

**Reliable fire detectors and intelligent danger management systems**

- Intelligent extinguishing
- Tailored solutions
- Innovative solutions
- Comprehensive fire safety

# Research & Development

**Drones**

Such is the extent of R&D in drone technology that it is far from complete. Veritech highlight some of the R&D that may be going on under the bonnet in the future. In the UK, commercial use of drones requires a CAA licence. Safety is paramount, as well as regard for privacy. Veritech take pride in our developments, striving for excellence whilst maintaining safety, quality and delivering cutting edge technology to our clients.

**Thermal imaging CCTV**

This technology is at the sharp end of detection, Intruders, Fire Detection and Surveying. Heat recognition cameras give clear imagery at long distance and in complete darkness, thus providing clients with complete peace of mind.

## How you benefit

You can relax in the knowledge that the security of your premises, property and sensitive material are in safe hands, and monitored 24 hours, 7 days a week from our in-house control centre.

Not only are our team highly trained and professional, but they also adhere to our values of friendliness and care.

They are in possession of all the necessary equipment to maintain ongoing monitoring and emergency responses.

### Staff training

Our training facilities include: First Aid, Fire Wardens, Fire Safety for Construction Sites, Asbestos Awareness, Person and Vehicle Searching, Manual Handling and Working at Heights.

We complete regular refresher training as well as up-to-date, job specific, tool box talks. These are monitored and updated via our Training matrix.

## Community care

As a local company we are always exploring ways to help out within the community.

Veritech Systems have a strong tradition of supporting the communities in which we live and work. We continue the tradition of supporting people and their local communities by providing funds to help registered charities, not-for-profit organisations, community and other voluntary organisations, making life safer, healthier and better for all of us.

If you have a project that you'd like us to support or participate in, we'd love to hear from you!

## Accreditations

At Veritech we seek and maintain all necessary accreditations to ensure compliance in all areas of our work. For detailed information on all accreditations, please talk to a member of our team or visit our website.

# Case studies and testimonials

## Alexander Devine Children's Hospice project

The Alexander Devine Children's Hospice were struggling with spiralling security costs and a system that left their site inadequately protected outside of normal working hours.

We worked with the charity to design a robust, fully monitored temporary site security system for an extremely affordable cost, keeping their valuable assets safe when the hospice is shut.

## Wates

*"Veritech Systems have provided our project with 24-hour security, CCTV, motion sensors and access control. The service that they have given has been exemplary, from the standard of guards through to emergency call-outs. I would highly recommend their service and would have no hesitation with obtaining their services in the future."*

## Sir Robert McAlpine

*"On behalf of The Quality Leadership Group from Sir Robert McAlpine, please accept our congratulations. High quality performance and good standards of workmanship are directly linked to the success of any project and I would be grateful if you would pass on this message of thanks to your team; in particular, the operatives and supervisors at site level, responsible for all the works."*

## Alfred Homes

*"Veritech has serviced our sites for several years and they have always demonstrated professionalism with a personal touch. Problems have never become a drama and a solution was always found."*

*I recommend them highly."*

## Student Roost

*"We have been using Veritech Security Services for our out-of-hours security service at our student accommodation. The guards are very good, always professional, well trained with a real can-do attitude which is essential in the student accommodation sector."*

*I would not hesitate to recommend Veritech Systems."*

Our team of security specialists are waiting for your call!
